

ANR Neuroblastoma Update Course 2010

June 21st, special registration necessary

Organisers: Professors Susan Cohn and Andrew Pearson

Neuroblastoma Biology

Using genome-wide strategies to discover new gene aberrations

Frank Speleman

Biological and clinical relevance of ALK mutations

Rani George and Yael Mosse

Risk Classification

INRG: Next Steps

Andy Pearson

Imaging

Using PET and MIBG to evaluate disease and response

Sue Sharp

Minimally Invasive Surgery

Is there a role for laparoscopic surgery?

Jed Nuctern

Low and Intermediate-risk Disease

Therapy and segmental aberrations for treatment stratification

Gudrun Schleiermacher

When should we use a "wait and see" approach

Frank Berthold

High-risk Disease

Immunotherapy plus retinoic acid: A new standard of care

Alice Yu

MIBG radiotherapy

Update on MIBG therapy

Kate Matthay

Late Effects

Late effects in Neuroblastoma

Lisa Diller

Relapsed Disease

Factors that predict outcome in relapsed disease

Wendy London

Novel Treatments

Molecularly Targeted Therapy

Lou Chesler
